LITTLE ITEMS OF LOCAL INTEREST

—FOR SALE—7-room house in good location, in the Village of Carbon. Apply to Box 275, Carbon, for particulars.

—Butch Leitch has just received a stock of Christmas trees. All prices. Get yours now, before they are all gone. 2tp

The Sunday School concert and Christmas tree will be held in the Farmers Exchange hall on Thursday Dec. 22, commencing at 8 p.m.

The proceeds of the Anglican Church banquet were:

Total receipts \$100.55
Hall rent and printing 12.05
Rev. W. Attwood 5.00
Balance \$ 83.50

FOR SALE

150 tons of prairie hay at Acme, in stack or F.O.B. cars.

J. FISHER WILLIAMS,
319-20th Ave., W.,
Calgary, Alta.

Dick Gimbel was a visitor in Carbon last Thursday.

Mrs. S. F. Torrance took her daughter, Marion, into Calgary last Friday to have her tonsils removed. They are expected back tomorrow.

Miss Lita Gordon returned from Calgary last Saturday.

Curling commenced on Monday night and in the play Burnett won from Torrance and Greenan from Oakley. The ice was not in very good condition, but every effort is being made to make it as good as possible under the weather conditions.

Mr. Dixon has the skating ice in fair condition and quite a few are turning out every night to enjoy the winter sport.

The Village council held a meeting in the office of the Secretary on Monday night.

Mr. MacLean, public school inspector, arrived in Carbon last Friday and inspected the local school.

J. A. Connolly is on the sick list this week and Mr. MacLean is taking some of the lessons with the pupils.

J. J. Greenan was a business visitor in Calgary last week.

The C.S.E.T. boys program and play on Tuesday night was well attended and the proceeds amounted to over eighty dollars. Space does not permit us to give a full account of this program, but we may say that the program was well carried out and well worth the admission fee.

Teacher: Tommy, can you tell me what a waffle is?

Tommy: Yes, a waffle is a pancake with non-skid tread so it won't slip off your plate.

Well, just about the time we get last year's Christmas bills paid a long drifts another Christmas.

When you face the bally wintah, an' the weatha's on th' blink, It bucks you up tremendously, Old Chappv, doncha think, When another chappy sends you' from another bally spot, A wish for Merry Xmas, like I'm sending you eh, what.

Xmas Cards from 5c to 35c Parker Fountain pens & pencils. Fine Stationery, Chocolates, Perfumes, Toilet articles, Cigars and Cigarettes in Xmas wrapping. Dolls, Games Novelties etc

Bathe the feet for several minutes with Cuticura Soap and warm water, then follow with a light application of Cuticura Ointment, gently rubbed in. This treatment is most successful in relieving and comforting tired, hot, aching, burning feet.

Sample Each Free by Mail. Address Canadian Depot: "Star" House, Ltd., Montreal. Price, Soap 25c, Ointment 25c and 50c. Cuticura Shaving Stick 25c.

Canada's Next Objective

The title to this article was the subject of a constructive address by Brig. General C. H. Mitchell, president of the Toronto Board of Trade, before the second annual convention of the Canadian Chamber of Commerce held recently at Vancouver. Some portion of that address can, we feel, be passed on with advantage to the readers of this paper. General Mitchell said, in part:

The Diamond Jubilee of Confederation sees Canada entering upon a period of its greatest expansion. It sees Canada United in an effort to improve its position as a nation within itself, and in an ambition to make a place for itself among the nations of the world. It already has an assured place among those nations forming the great British Empire. It has consolidated its position after the war by quiet, persevering effort, and has steadied down to the solid things which can build up a country. It is now ready for and is indeed progressing toward the next objective.

Canada has huge fertile agricultural regions. It has wealths of forest, mineral and water power resources. Its geographical and its topographical features form an asset rather than a hindrance to its development. It has busy ports on the two great oceans of the world, and it has a waterway to the heart of the country. It occupies half of North America, is in the centre of the great British Empire. It is midway between the East and the West and on the way between Europe and Asia via America. It has great transcontinental railways and fleets of inland shipping. And along with this favorable position and its unsurpassed natural material resources, it has human resources of contented, industrious, law-abiding people of solid character and high ideals. Our natural wealth lies in our potential assets and in the development and use of these resources. We have made our way magnificently in the past sixty years, but ours is a country of the future, and we in Canada are the trustees of these great assets for those who are to come after us.

With all these resources and at this particular time, what then is our next objective? We are bound to progress along some road and in some direction and at some rate. The road must be toward increased prosperity, and the manner and the rate of travel are for us, ourselves, to determine. The answer lies somewhere among our natural resources. The objective for our effort in Canada's next period of expansion lies on the high ground before us, which we must attack with a united front to secure initiative and gain superiority in the markets of this continent, of the Empire and of the world.

To develop these resources, to supply the needs of the different parts of our own country, of the continent, and of the world, we must:—

1. Know what resources we have in stock.
2. Ascertain what of our resources are the best sellers: (a) to ourselves—provincially; (b) to the Empire—the Mother Country and overseas Dominions; (c) to the other nations of the world.
3. Determine with what resources we are first to enter into competition, and with what next to follow.
4. Build up entirely new industries, and trade from those resources in which we are predominant or which are peculiar to Canada.
5. Create a demand for our products: (a) provincially; (b) nationally; and (c) internationally.
6. Conduct extensive publicity in all possible markets for those products in which we can readily compete.

To further develop the assets of these great Canadian natural resources is the first duty of every citizen of every community and of every province. The problems involved in such further development are many and varied. New problems arise and old ones recur in new forms. Changed conditions bring different problems looked at from new angles.

General Mitchell proceeded to enumerate some twenty problems awaiting scientific and economic solution, upon the commercial success of which, he contended, will depend much of the future and future value of our natural resources. Included in this list is improvement of our wheat culture to secure earlier ripening varieties; effective measures to prevent rust in wheat; cheap and effective transportation of our basic products by water as well as by rail; the economic preparation of low grade fuels, such as lignite, for commercial use; economic long distance electric power transmission; elimination of alkali from the soil of certain of the western agricultural areas and protection of structures from attack; development of the pottery and ceramic industry from our vast deposits of clay; the utilization of the waste straw of our agricultural areas for fuel or other purposes.

These are some of the things which we must set ourselves to solve, as a nation of energetic, alert people. We must unite our Human Resources to develop our Natural Resources.

It is our national duty at this time to look forward with cheerfulness and confidence and to attack these and our other problems with all our energy and skill, with a pride in Canada and the Empire, and with firm faith in its future.

Road To Flin Flon Area

Construction Work Will Proceed With All Possible Haste

Preparations for the construction of the railway into the Flin Flon mining area of Northern Manitoba, which will open the way for a \$50,000,000 development of mineral resources in the north country, already are under way, following the letting of the contract.

Supplies and equipment are being concentrated for shipment to The Pas,

which is 75 miles southwest of the Flin Flon property and within a short time 500 men will commence the preliminary work of road-making and this number will be increased to 2,000 or more as the work progressed up to next summer.

The first trainload of equipment to be used on the Flin Flon railway left Montreal recently, and this will be followed by additional loads within a few days. By spring millions of dollars' worth of construction material and an army of workers will have been assembled in the north country.

Very soon the sound of the hammer will have broken the silence of the north, the first work being the construction of between 20 and 30 huts to house the advance contingent of workers. The western labor market will be called on to supply all the men to be employed on the project, and no workers will be brought in from Eastern Canada.

Under the contract, trains must be running between Shewan, near The Pas, and the Flin Flon mines, by December, 1928. The construction of the road involves an estimated expenditure of \$1,000,000.

Canada's Naval Expenditures

Grand Total For Last Fiscal Year Amounted To \$1,597,406.51

The grand total of Canada's naval service expenditures for the fiscal year ended March 31, 1927, amounted to \$1,597,406.51, according to the annual report of the national defence department just issued here. Of this million and a half dollars, over one-third was consumed by the barracks at Halifax, N.S., and Esquimaux, B.C., the former accounting for \$266,005.17, and the latter for \$259,431.53. The maintenance of the two destroyers, Patriot and Patricia, cost the country \$199,219.89 for Patriot, and \$167,574.39 for Patricia. The four mine sweepers, Festubert, Ypres, Armentieres, and Thierval, accounted for \$169,741.86 of the annual expenditures.

Why Hobble Along On Sore Corns?

Don't cut corns with an old razor. Infection followed often by death may result from paring corns with an infected knife. Quick, safe relief comes from using Putnam's Corn Extractor. If afflicted with corns, calluses or sore footlumps, use "Putnam's"—it's reliable and sure to shrivel up the corns so they drop right off. No pain, no soreness, but quick relief from sore corns comes to all who use Putnam's Painless Corn Extractor. 25c. at all dealers.

Will Visit English Centres

Thirty Scholarships Announced To Aid Work Of T.B. Association

The Canadian Tuberculosis Association announced following a meeting of the executive at Ottawa, that the association had completed arrangements whereby thirty scholarships of \$500 each have been granted to assist saturated sanatorium and chest diagnosticians in Canada to visit the tuberculosis centres in England, France and Italy, in 1928. Those awarded scholarships will spend a fortnight in Great Britain, where the British Ministry will discuss with them the problems of tuberculosis, and then a tour by motor bus will be made to all the tuberculosis institutions in the United Kingdom.

The Last Asthma Attack may really be the last one if prompt measures are taken. Dr. J. D. Kellogg's Asthma Remedy will safeguard you. It will penetrate to the smallest bronchial passage and bring about a healthy condition. It always relieves and its continued use often has a permanent effect. Why not get this long-famous remedy today and commence its use? Inhaled as smoke or vapor it is equally effective.

The sugar beet crop in Southern Alberta this year will, it is estimated, yield between 45,000 and 50,000 tons, the largest crop in the history of the industry in Alberta. Last year's crop was 41,000 tons.

Sores Heal Quickly.—Have you a persistent sore that refuses to heal? Then, try Dr. Thomas' Electric Oil in the dressing. It will stop sloughing, carry away the proud flesh, draw out the pus and prepare a clean way for the new skin. It is a recognized healer among oils and numbers of people can certify that it healed where properly applied.

It is estimated that Prince Edward Island, the smallest of the nine provinces of Canada, will have a total production of potatoes this year of 8,000,000 bushels. A considerable percentage of this crop will find a market in the United States.

The husband is apt to be pensive if the wife is expensive.

Pain Over Kidneys Was Soothed Away Lost Appetite Completely Restored

A splendid recovery was made by Mr. A. S. Gray of Elbro, Sask. He heard of a good kidney medicine and used it. "I started using Dr. Hamilton's Pills a few months ago and find them a great medicine for Stomach, Liver and Kidney troubles. After taking a few boxes of Dr. Hamilton's Pills the soreness in the region of my kidneys is nearly all gone. I am eating anything now, which I couldn't do before taking Dr. Hamilton's Pills." — A. S. Gray.

These mild yet active pills contain vegetable restorative, such as man-brake and butternut, and put new life into the liver and kidneys. They soothe away backache and make you feel brisk and full of "pep." 25c at all dealers.

Western Bred Cattle Big Winners

Cattle Bred At Glencarnock Stock Farms, Brandon, Capture Prizes At Chicago International

Canada, and western Canada in particular, has every reason to feel proud of the excellent showing made at the recent Chicago International Exposition. The numerous awards coming to western Canada should draw the attention of outsiders as well as our own people to the fact that our agricultural and livestock growers can more than hold their own in competition with any part of the American continent. In proof of the fact that we are producing as good livestock in western Canada as in any part of America, may be mentioned the honors carried off by the Glencarnock Stock Farms of Brandon, Man. James D. McGregor, the proprietor, who is a breeder of Aberdeen Angus cattle, has made what is believed to be a record for all times at the Chicago show. It is very doubtful if at any previous international, animals bred by one individual, have carried off so many honors. All the classes of cattle were very strong and exceptionally well represented this year. All the best animals of Canada and the United States were gathered there, and an animal had to be outstanding to receive recognition. Awards given to Glencarnock bred cattle were as follows: Grand champion bull On Revolution, 7th; grand champion female Glencarnock Jessie, 9th; senior champion female, Glencarnock Black Lassie, first prize; two year old heifer, Edella of Glencarnock, first prize; junior yearling heifer by Eventuation, out of Barbara of Glencarnock, second prize; carcass steer, Briandell Favorite, sired by Glencarnock Blackmere, fourth prize. Truly a remarkable record for an individual breeder.

Opportunities Are Here

Native Sons Of Canada Are Drifting Back From United States

Projects such as the proposed Flin Flon development scheme should help to bring Canadians home from the United States. Such contemplated development schemes may or may not be a factor in the increased return from the republic of native sons of the Dominion which appears to have set in, but it is apparent that there is such a return movement. The latest official figures from Ottawa further indicate this.

In the seven months' period from April 1 to October 31, 25,864 Canadians who had gone to the United States with the intention of residing there permanently returned home. This seems an encouraging sign of the times and it is to be hoped it will continue and even become more pronounced as time goes on. Canada is, without doubt, on the eve of one of the greatest development periods in its history. The north, in all the provinces, is being concentrated upon with redoubled vigor. The Flin Flon development project in itself, and all that it portends in its several ramifications, offers a challenge and an opportunity to the youth of Canada. — Regina Leader.

For Sprains and Bruises.—There is nothing better for sprains and contusions than Dr. Thomas' Electric Oil. It will reduce the swelling that follows a sprain, will cool the inflamed flesh and draw the pain. It will take the ache out of a bruise by counteracting the inflammation. A trial will convince any who doubt its power.

Thanks To the Prairies

Wheat Crop This Year Is Second Largest in Canada's History

While pessimistic Easterners perhaps can read nothing about the West except the fact that the prairie provinces have been experiencing below-zero weather, the optimistic are throwing their hats in the air at the announcement that Canada's wheat crop this year is the second highest in the history of the Dominion.

The final estimate of the Dominion Bureau of Statistics, even more encouraging than earlier surveys, places the total wheat crop for this country at 444,282,000 bushels, a figure that has only once been beaten.

The Western provinces, of course, have been chiefly responsible for this huge total, which is large enough to justify general rejoicing throughout the whole of Canada. — Peterborough Examiner.

Minard's Liniment for Colds

LESSON No. 20

Question: Why is emulsified cod-liver oil so very helpful as a vitamin food for expectant and nursing mothers?

Answer: Because it provides an easily assimilated food rich in the essential vitamin that aids in building strong bones and good teeth.

Take pure, wholesome, pleasantly flavored

SCOTT'S EMULSION

Leaves Jewel To Queen Mary

Russian Countess Gives Brooch Originally Chosen For Empress

Countess Torby, the daughter of Prince Nicholas of Nassau and his morganatic wife, and granddaughter of Pushkin, the Russian poet, bequeathed a ruby brooch and pendant, originally chosen for the Empress Alexandra of Russia, to Queen Mary.

The Countess, who died last September and left English property valued at \$85,000, directed that the pearl necklace she was in the habit of wearing daily should be sold to pay the death duties on the estate.

RUN DOWN IN HEALTH

Why Many Men and Women Are Badly Handicapped

When you are so run down in health that it impairs the efficiency of your work as well as your power to enjoy your leisure hours, or obtain rest, it is time you looked to the cause. If you do not, a serious breakdown is almost sure to result. In nearly all cases this condition, which doctors usually describe as general debility, is due to poor blood—blood that is deficient in red corpuscles. When the blood is thin and weak your whole system suffers. You lose appetite, have no energy, your nerves trouble you and you feel restless.

What you need is help to build up your blood and you should begin at once to make your blood rich and red by taking Dr. Williams' Pink Pills. You will soon notice the difference in your health by a better appetite and increased vigor. The reason is that the new blood created by Dr. Williams' Pink Pills stimulates all the organs of the body to healthy activity and so the system gains nourishment and strength. If you are weak or out of sorts, begin gaining new strength today by taking Dr. Williams' Pink Pills. "I was in badly run down condition," says Mrs. J. Potter, of Winifred, Alta., "when I began using Williams' Pink Pills and they fully restored my health. I strongly recommend this medicine to all weak people."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Taking Vacation in Row Boat

After fourteen years at sea and sixteen years spent along the beach, Charles Seifert, 67, is going on a vacation. He is rowing a 12-foot skiff from New York to Miami, Fla., hugging the shore line all the way. Once there, he will row back again, planning to return before the bathing season starts, for he is a bathhouse keeper.

HEART WAS SO WEAK Had to Stay in Bed

Mrs. F. Wilson, Lethbridge, Alta., writes:—"My heart was very weak, and I had to stay in bed for five weeks with it."

"My aunt advised me to take

as she had taken them with good results after a very bad operation.

"I took them and some time after a doctor came to examine me for life insurance and he said there was nothing wrong with my heart."

Milburn's Heart and Nerve Pills are 50c. a box at all druggists and dealers, or will be mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

The Great Preventative

for coughs and colds. For grippe heat and inhaled Minard's. Also rub it on throat and chest.

SWALWELL ITEMS OF LOCAL INTEREST

The Ladies' Aid met at the home of Mrs. Ott the meeting being the last one of the fiscal year of the Aid, and included the election of officers for the ensuing year, the officers elected were as follows: President, Mrs. E. Litz, Vice-Pres., Mrs. B. Tricker, Sec.-Treas., Mrs. Claypool, (Mrs. Duitman to act pro tem until Mrs. Claypool's return from the States).

Through their efforts on Saturday last the Ladies' Aid made a net gain of about \$70.00 raised by a sale of work and serving after-noon tea. Considering the weather they are to be congratulated on the amount raised.

We are a little late in congratulating Mr. and Mrs. E. Young on the birth of a son.

Roseview having made their required number of attendances for the year, the school closed for the Xmas. vacation last week, and Mr. and Mrs. Scragg have left for Craigmyle where they are to spend Xmas.

Quite a number of Swalwellites made up a sleighing party and journeyed to Fertile Valley school house on Friday night last to a dance held there and report having the usual good time.

Mrs. C.R. Nash was in town over the week end and the house of a thousand and one bargains has now taken on a very seasonable and festive appearance.

While alterations are going on to the water supply, curling enthusiasm is somewhat stagnant, but when alterations are completed the indications are that the arrangements will go forward with increased and very much renewed vigor.

Mr. W.E. Mann has gone to Calgary and will undergo an operation, at the Holy Cross hospital, and we think will spend Christmas there. We hope to see him back soon and feeling just a little bit better than ever.

Twenty-First Annual Meeting of United Grain Growers Limited

Reports Show Successful Year and Sound Financial Condition of Company—Delegates Insist on Maintaining Livestock Marketing Service.

Winnipeg, Manitoba, Dec. 5th.—Two outstanding features marked the discussions of the delegates attending the twenty-first annual meeting of United Grain Growers last week.

The first was the refusal of the delegates to allow the closing of the Company's livestock business in Alberta. The Directors' report outlined the development of the new Provincial livestock marketing organizations in each of the three provinces and recommended that the Company's livestock business in Alberta be closed. In Saskatchewan they had already closed the Company's livestock office on the Moose Jaw yards, owing to the fact that the Saskatchewan Co-operative Livestock Producers had decided to commence operations in that province. In Alberta the Alberta Co-operative Livestock Producers had declared their intention of opening their own livestock selling agencies on the yards at Calgary and Edmonton on the first of the year, instead of having their livestock marketed through the Company's offices as heretofore. Because of the situation thus created, the Directors recommended closing the livestock business in Alberta. Delegates from Alberta, however, insisted that the farmers of that province should not be deprived of the marketing service they had been getting for their livestock. The meeting asked for information on the plans of the new provincial bodies and was addressed by A. B. Claypool, representing the Alberta Co-operative Livestock Producers, Limited, W. D. McKay of the Saskatchewan Co-operative Livestock Producers, Limited and I. Ingaldson of the newly organized Manitoba body.

After a lengthy discussion, and in spite of the fact that the Directors pointed out possible losses from continued operations of the livestock business, the meeting passed a resolution instructing the Board of Directors to continue livestock operations at St. Boniface, Edmonton and Calgary, and to re-open at Moose Jaw if considered advisable.

The second was the demonstration that the question of the possible sale of the Company's elevator system to the Pools had been finally settled a year ago at Calgary. A resolution proposing action along these lines was submitted to the meeting but the delegates refused to discuss it and by a very large majority tabled it and passed on to the next order of business.

The reports submitted to the meeting showed that the financial year which closed on August 31st last was one of the most successful in the history of the Company. Net earnings for the year were \$720,265.94. The balance sheet showed current assets of \$4,942,000.00 against current liabilities of \$2,555,000.00. At the end of August the Company had in cash and in Government bonds alone over \$300,000.00 more than would have been required to pay every dollar of its current liabilities. In the Shareholders' Cash and Surplus Account there is now \$5,085,066.31 as compared with the capital stock paid up by shareholders amounting to \$2,979,078.48.

The four retiring Directors were re-elected on the first ballot. These are: Hon. T. A. Crerar, C. Rice, Jones, John Kennedy and D. G. McKenzie.

General Letter to the Trade

Dear Sir or Madam:—

We wish to advise that after the first of the year, 1928, we are going to adopt a new system in our business. We are making a general reduction on all lines of groceries and will eliminate the usual 5% on cash purchases. In doing this we place our business on a cash basis and our prices on a level with the closest competition, but should necessity develop that you will require accommodation it will only be on a 30 day basis and any account that runs over that period will be subject to a 2% per month Interest Charge.

We do not wish to encourage this latter method as it is not particularly advantageous to the customer or ourselves, but we must adopt a system that will help us carry the heavy Interest charge that we have to contend with through the financing of long term credits.

Your account is now due and it amounts to and to save this extra interest we would request that you have it paid before the end of the year. We thank you for your patronage in the past and trust to be favored with a continuation of same.

Yours truly,
POWERS BROS.

Complete The Joy of Christmas
Have a Westinghouse Radio in your Home

Expressed in a Westinghouse Radio model, the gift to your family is a lifelong delight. Every day, instead of but once, fresh and new after other gifts are forgotten, a Westinghouse gives countless hours of enjoyment—everlasting reminders of your Christmas wishes.

Never before have you been able to buy such a splendid set as the 57 at so moderate a price. It contains all the improvements found in a set twice its price. One dial control makes it as simple to operate as turning on a switch. This new model operates on the new UX-201-B radiotrons which consume but half the current of tubes of equal power—consequently operating charges are cut in half.

You will have to hear and see this model to fully appreciate its beauty and great value. Demonstrations will gladly be given in your own home without cost or obligation. Arrange for a demonstration to-day.

WORLD HAPPENINGS BRIEFLY TOLD

The Banff winter carnival is to be held the week of February 1 to 11 this winter.

Sweden's first woman judge, Miss Mary Traugott, has made her debut in the county assizes at Svartholm, near Stockholm.

The annual dog racing classic of Eastern Canada, the Eastern International Dog Sled Derby, will be run again at Quebec City, February 20-22.

The first Anglo-German hockey game since the war was played at Folkestone, England, December 8, and resulted in a draw with a score of 2-2.

A caution is issued at Ottawa by the Canadian Tuberculosis Association against accepting too readily "cures for tuberculosis," announcements of which have been recently published.

Engineers of the Canadian Marconi Company are conferring with officials of the Radio Corporation of America on plans to start a short wave system between New York and Montreal.

On a clipping from an American magazine, Alexander L. McKay of North Vancouver made his will, two days before he died. The will was probated in supreme court there.

Feeling that their interests require more adequate representation, residents in the North West Territories are petitioning the Dominion parliament for a seat to be provided for that section of the country.

Announcement is made from London, England, that the Empire Marketing Board will give a special reception and dinner to the party of Canadian farmers which is to go overseas during the coming winter.

After 52 years of continuous service, Frances E. Harrison, Vancouver postmaster, has been superannuated, effective June 30 next. On January 1 Mr. Harrison will leave on six months' vacation with full pay.

Canada Retires Loan

Financing By Federal Government Shows a Healthy State Of Affairs

An indication of the healthy state of Canada's financial condition is given in a recent announcement by Hon. James A. Robb, Canadian Minister of Finance, to the effect that of \$100,595,659 loans maturing between Nov. 1, and December 1, \$55,595,659 will be paid out of revenue and the balance of \$45,000,000 will be taken care of by an issue of four per cent. three-year treasury notes which have been sold to the chartered banks of Canada at par. By this arrangement interest charges of \$2,697,899 annually will be saved.

The sale of these treasury notes marks the first financing since 1912 which the Dominion Government has effected at a net cost as low as four per cent. The treasury notes will be dated December 1, 1927.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Exterminator.

Sales Are Not Brisk

Although whaling as a profession is almost extinct, one concern in Seattle still receives orders for harpoons from isolated whalers in the North Pacific and Atlantic. A recent order received was for three heavy whale harpoons to be shipped to a Norwegian port.

"What do you want for your birthday?"
"A piece of string?"
"A piece of string?"
"Yes, with a clockwork horse at the end of it." Pages Gules, Yverdon, Switzerland.

Says Electric Power Will Be Broadcast

Scientist Believes It Will Be Accomplished Before Long

The transoceanic aeroplane of the future will be made without fear of running out of gasoline—because no gasoline will be used. Nicola Tesla, eminent electrical scientist and inventor, makes the prediction with perfect confidence, saying that electric power soon will be broadcast as radio waves now are.

Disclaiming his statement to be that of a visionary, Tesla offered as proof of the fact that he already has succeeded in sending power through the air—nearly half way around the world—with a loss of 1 per cent. of its strength. When this feat can be duplicated cheaply enough to make it applicable to practical use, power would be produced only at great central stations and there broadcast over a wide area for use in motor cars, aeroplanes, homes and factories.

Tesla believes he will live to see the plan in operation.

Summer Fairs Are Popular

Canadian National Exhibition Leads All Others On Continent In Attendance

The Canadian National Exhibition at Toronto led all the fairs on the continent last summer in attendance with 1,570,000. The state fair of Texas was second with an attendance of 1,029,000. These figures were contained in the report of E. L. Richardson, of Calgary, president of the International Association of Fairs and Expositions.

Fairs each year are becoming more popular and more successful, educationally and financially. More than 59,400,000 persons attended the 236 fairs in the United States and Canada this year. The attendance has increased by about 2,000,000 persons every year since 1910.

Investment in fair buildings and grounds now totals about \$250,000,000, while premiums and prizes last year had a total value of more than \$8,000,000.

A Chic Frock

This charmingly youthful frock is a new and decidedly smart style for the miss or small woman. The two-piece skirt is attached to a scalloped bodice, and lace or contrasting material is effectively used for the front inset and lower part of the gathered sleeves, and a belt fastens at the front with a buckle. No. 1694 is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 27½ yards 39-inch, or 2½ yards 54-inch material, and 13 yard 39-inch contrasting. Price 29 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

Wheat Pool London Office

Will Act As Intermediary Between Winnipeg and European Countries

Interviewed on reaching Liverpool, D. L. Smith, of Winnipeg, former general sales manager of the Canadian wheat pool, who was accompanied by R. A. McPherson, Delta, Alta., a director, stated that he had journeyed to England to establish a London office for the pool, but this, he said, did not mean that Canadian grain would be any cheaper here. He pointed out that neither the pool nor the Canadian farmer could sell crops any cheaper. "As a matter of fact," Mr. Smith said, "your bread is considerably cheaper than ours in Canada, although we have grain on the spot." He explained that his idea in opening the London office was to act as an intermediary between Winnipeg and the European countries. Direct selling to the miller was not contemplated, he said.

Mr. MacPherson said the season's crops for Alberta, Manitoba and Saskatchewan controlled by the pool was 110,000,000 bushels, but owing to frosts the quality was somewhat inferior. "We do not want to screw the customer, but our farmers are growing wheat for business, not for pleasure," he said.

Mr. Smith, in commenting on the state of farming in Britain, said it seemed to be in much the same condition as that in the United States. Wealth in both countries, he said, was in the cities, and both countries were crying for state aid for agriculture. He fancied English farmers should meet together more and work in closer cooperation, as was done in Canada.

A Profitable Wheat Crop

Phenomenal Yields Of Wheat Reported From All Parts Of Alberta

Phenomenal yields of wheat and other grains are being reported from all parts of Alberta. R. R. Fraser, a farmer at Munson, Alberta, had a total yield of 12,129 bushels of wheat. One field of 162 acres of winter wheat produced 7,280 bushels of 70½ bushels to the acre, while a 120-acre field of spring wheat yielded 4,810 bushels or over 40 bushels to the acre, so that his average for the two fields was 59½ bushels per acre.

The province of Alberta has a wheat crop this year of 178,519,000 bushels, the largest crop in its history, and an increase of 65,359,000 bushels over last year.

Don't waste time sighing over what might have been; make the best of what is.

How Mr. Bildrullen's bed is fixed up so that he can fall into a deep, and peaceful slumber. — Kasper, Stockholm.

SUNDAY SCHOOL LESSON

DECEMBER 18

THE EARLY PROPHETS OF ISRAEL

Golden Text: "God, having of old time spoken unto the fathers in the prophets by divers portions and in diverse manners, hath at the end of these days spoken unto us in His Son."—Hebrews 1:1, 2.

Devotional Reading: Psalm 67.

A Review By Means Of Allusions

The sun is set; and in his latest beams
Yon little cloud of ashen gray and gold,
Slowly upon the amber air unrolled.

The faltering mantle of the prophet seems.—Longfellow.

The Assyrian came down like the wolf on the fold,
And his cohorts were gleaming in purple and gold;
And he has left no survivors,
Like the leaves of the forest when autumn had down,
That host on the morrow lay withered and brown.—Byron.

We also have our calling of God, as truly as any ancient prophet; and round us also the tempest at times shouts, and beneath our feet the earthquake trembles, and about us fire threatens to destroy.—John Page Hopp.

Let each one ask himself whether he is seeking to please God by doing justly, loving mercy, and walking humbly before him; whether he is, on the side of God, and of the things which are pleasing in God's sight.—Borden P. Bowne.

On Carmel's height a strong man bowed in prayer;
Helpless apart from God, in prayer he bowed.—Winifred A. Iverson.

The Nebuchadnezzars are God's axes with which he hews down fruitless trees. They are responsible for their acts, but they are his instruments, and it is his hand that wields them.—Alexander MacLaren.

"In a very real sense we cannot indict a whole nation. The truth is, we do not know how many in that country have refused to bow the knee to Baal."

We may win our vineyard, but all the pleasure in it goes when conscience accuses us at the gate.—F. B. Meyer.

"Let justice, unimpeded by avarice or selfishness or cruelty, roll down as waters."

He who shows me the achievements of a brother man, touches my lips with a live coal from off the altar.—Carlyle.

"With the cords of a man Jesus is drawing men; in the bands of love He is binding the world together."

Help us with the grace of courage, that we be none of us cast down when we sit lamenting amid the ruins of our happiness or our integrity; touch us with the fire of Thy altar, that we may be up and doing to rebuild our city.—R. J. Stevenson.

Take the task He gives you gladly,
Let His work your pleasure be;
Answer quickly, when he calleth,
"Here am I, send me,"—March.

Up, Christians, leave your caves and do!—F. B. Meyer.

"Some of the dull blind priests on that day were saying, 'Religion means sacrifice and burnt-offerings.' Then this prophet showed them the folly of all those outward signs of devotion apart from the inward spirit."

Many people are almost crippled with corns. But it is needless suffering which can be speedily ended with Holloway's Corn Remover.

Recipes For This Week

(By Betty Barclay)

POOR MAN'S PUDDING

6 cups whole milk.
½ cup rice.
½ cup sugar.
1 teaspoon salt.
½ teaspoon nutmeg.
½ cup raisins.
Put all together in a buttered pan in a moderate oven. Stir frequently at first, and then occasionally. Bake 2 hours. Should be creamy. Better cold than hot.

PINEAPPLE PUNCH

1 quart water.
2 cups sugar.
2 cups chopped pineapple.
1 cup orange juice.
½ cup lemon juice.
Boil water, sugar and pineapple 20 minutes. Add fruit juices, cool, strain and dilute with ice water if necessary. Either fresh or canned pineapple may be used.

Minard's Liniment for Grippe.

Exports of cheese from Canada for the 12 months ended October 31, 1927, totalled 117,818,500 pounds valued at \$22,607,501. Most of this cheese found a market in the British Isles. Exports of Canadian butter during the same period were 3,527,400 pounds valued at \$1,317,593.

New 'Plane Is Weather Proof

Can Travel Under Any Conditions Opinion Of Inventor

An airship which, it is said, will be able to cross the Atlantic and back in almost any weather, has been designed by four young ex-naval officers.

It has a rigid keel, though the ship is of the half-rigid type, and can carry with ease forty passengers and cargo, while it can negotiate any of the difficulties met with in night flying, or in fog.

Two big rigid airships are now being built by the British Government for long distance transcontinental and trans-oceanic transport, involving non-stop flights of 1,000 miles and upwards.

The new airship has a torpedo shape without the usual projections.

Spacious sleeping and saloon accommodation will be provided, free from noise and vibration.

The new keel arrangement is said to give an enormously increased internal strength. Risks due to fire, leakage of the envelope, landing on water or in high wind, refuelling in flight, have all been dealt with in detail.

Lieut. C. Lincoln Sutton, late R.N., said that although the envelope of the proposed new airship is filled with inflammable gas no fears need be entertained as to its safety.

A new type of ground plant has been evolved for use on land or water which makes it possible to handle the ship in any weather, employing only the ship's crew and a ground staff of two men.

Mr. Graham Wood, the designer and inventor of the airship, which fulfils the early predictions of H. G. Wells, qualified as an air pilot in 1912. He was one of the first 200 airmen to qualify in this country.

Has New War Device

Japanese Doctor Experiments With Human Hair As Explosive

Experiments with a new type of explosion which may revolutionize the nature of warfare and the explosive methods used in industry have developed in the Tokyo laboratory of Dr. Hantaro Nakaoka, prominent Japanese authority on physics. The method is to pass a direct current of 40,000 volts and 10,000 amperes through a human hair or metal wire. Under such circumstances the hair explodes instantaneously, producing 10,000 degrees of heat, accompanied by a report as if many guns were fired, it is said. Dr. Nakaoka began this experimentation in an effort to solve mysteries relative to the atomic activity of the hot stars. Human hair is said to be largely cellulose, the same material from which most modern high explosives are made.

Preserving "Pusher" Plane

Earliest One Used By Curtis Only Survivor Of Its Type

The old Curtiss "Pusher" plane, in which Glenn Curtis made some of his earliest flights, will take its place among antiquities in the Smithsonian Institute soon. The plane, its joints loose and its frame rusty, has been hauled out from the junk heap at the Curtiss Aeroplane Company's factory, and mechanics are getting it ready for its last resting place. It has been earthbound since 1925 when Bert Acosta took it up for an exhibition flight.

The plane so far as is known, is the only survivor of its type. It was known as a pusher plane because the engine was behind the pilot and the propeller pushed the plane along sometimes as fast as fifty miles an hour.

"Now I have bought you that hoop, I hope that you will sit quietly near me!"—Journal Amusant, Paris

FEDERAL SURPLUS OF 60 MILLIONS IS REPORTED

Ottawa.—With eight months of the fiscal year closed, the surplus of Dominion revenues over expenditures stands at rather more than 60 millions of dollars.

During the month of November the net debt of the Dominion, largely as a result of interest payments on loans, increased by \$17,732,000, but taking the eight months as a whole the reduction in net debt now totals \$69,784,000.

Prospects for a substantial surplus in the next budget, with consequent reduction in taxation, are therefore regarded as very bright.

The decrease in net debt is 15 millions ahead of what it was on the same date last year.

Total revenue over the eight months shows an increase of 20 millions of dollars more than in the eight months of last year; total expenditure an increase of five millions.

Customs duties are up nine millions and excise duties up five millions. Income tax is up six millions, post office up three millions. Excise taxes (sales, stamps, etc.) are down ten millions.

On Nov. 30 the net debt of Canada was \$2,287,049,782; on Nov. 30 last year, it was \$2,344,436,755.

Gold Shipped From New York To London

First Time Since Outbreak Of World War

New York.—Gold has been removed from New York to London for the first time since the outbreak of the Great War in 1914. The shipment, which amounts to \$1,000,000, was announced by the "International Acceptance Bank, Inc.," but with the exception of a statement that it was a "special transaction" no details were made public.

The gold in the form of coin, was removed from the vaults of the Federal Reserve Bank of New York for forwarding on the Cunard liner, Aquatania, to a correspondent in London. Although the sensational advance in sterling exchange had caused Wall Street to include in its calculations the possibility that part of the huge hoard of gold accumulated in this country since the war might be transferred to England, announcement that a shipment actually had been arranged occasioned some surprise.

For Royal Clemency

Offenders Under Manitoba Liquor Laws May Receive Consideration

Winnipeg.—A petition for royal clemency towards offenders under existing liquor laws is now in circulation.

Contending that they have sufficiently paid for their misdemeanors against former laws, a number of friends and relatives of persons whose jail terms will not have expired by the date when the new consolidated liquor laws are likely to have passed have organized to bring pressure on the Government to liberate these prisoners at that time. Although the Government's view of the petition is not yet known, it may be contended that these prisoners and others actually committed to jail after the passing of the new act are still subject to punishment under clauses in the new legislation.

Motion Of Censure Defeated

Ramsay MacDonald, Labor Leader, Moves Vote Of Censure Against Baldwin Government

London.—A motion of censure moved in the House of Commons against Premier Baldwin for his failure to participate in the coal debate on November 16 was rejected by a vote of 347 to 142.

The vote of censure was moved by the Labor Leader, Ramsay MacDonald, and a seven-hour debate ensued.

The Prime Minister, in the course of his remarks, explained the manifold tasks imposed upon him, and intimated that the duty of leadership in the House would eventually have to be delegated to some other minister.

W. N. C. 1711

Government Ownership Failure In Belgium

System Yielded More Revenue In Hands Of a Company

Brussels.—So successful has been the first year of Belgium's experiment with quasi-private instead of government ownership of the railroads, a change forced by the financial panic of a year ago, that the postoffice, telephone and telegraph systems are destined soon to be taken out of the ineffectual hands of the state.

The whole public ownership system, which potentially is a gold mine, yielded a mere \$1,100,000 last year although the railroads never yielded anything. With the Socialists out of the cabinet and a member of the Liberal party at the head of the department, it is expected that M. Franqui, the old fox of Belgian finance and veritable dictator of the country's financial policy will seize the opportunity to give the theory of public ownership another body blow, making the system yield real money in the hands of an autonomous company. Public opinion is actually averted at the success of the railway experiment and is considered ripe for the transfer which was impossible even 15 months ago.

Observe Friendships Pact

Tryst Kept At St. Paul's Cathedral After 22 Years

London.—Observing a pact of friendship made 22 years ago, four men met on the steps of St. Paul's Cathedral one day recently and sang "Auld Lang Syne" with joined hands. They were survivors of a party of eight friends who, in 1905, when, fellow-workers, made a pact to meet at St. Paul's 20 years later. The tryst was kept two years ago by the four, two of the others having fallen in the war and two having died. The survivors agreed to make the gathering an annual event.

As the friends were on the point of leaving the Cathedral to go to dinner together, they were joined by the widow of one of their former colleagues, who, with her daughter, had come to keep the tryst on behalf of her late husband.

Thousands Fight For Sacred Relic

Hindus Pay Huge Sum For Garments Of Widow

London.—Thousands of Hindus fought to obtain fragments of the charred clothing of a Hindu woman who suffered fatal burns attempting to perform the ancient rite of suttee—self-immolation of a widow with the body of her husband—says a despatch to the Evening News from Allahabad.

The widow, who was rescued by the police from the funeral pyre of her husband, subsequently died of her burns, and her body was thrown into the sacred Ganges near Patna.

Hundreds of rupees were paid for possession of her garments, which are regarded by the Hindus as sacred. Fully 15,000 Hindus fought to obtain fragments of her clothing.

Travelled By Dog Team

Doctor Made Long Trip To Aid Dying Boy

McCall, Idaho.—A dog team carrying medical aid to a dying boy across a hundred miles of bleak Idaho mountain country was believed to have won its race.

Traversing the rugged snow-covered hills in bitterly cold weather, the mushers reached the Wordenhoff Mine in the Thunder Mountains in time for Dr. Don Numbers to administer to Emmett Routson, 20.

Dr. Numbers began his trip to the mine by automobile. Heavy snow blocked him, and he enlisted the aid of Roy Stover, musher, and a team of crack sledge dogs. Young Routson was stricken with influenza and hemorrhages, and hope was given up for him unless medical help arrived quickly.

Wins More Awards

Guelph, Ont.—W. J. McCallum, of Brampton and Regina, was a big winner at the provincial fair yesterday, capturing both championships in the Percheron classes and junior and grand Clydesdale on his Lord Wellington, a young animal which went to the top at both the Toronto Royal and the Ottawa Winter Fair.

Champion Girl High Jumper

Ethel Catherwood of Saskatoon, the sensational western Canadian girl high jumper, who won the Canadian high jump championship and set up a new record of 5 feet 2 inches last summer, will probably be an addition to Ontario's strength after the first of the year. Her manager says she is coming east to make her home.

Northern India Swept By Cholera Epidemic

Smallpox Has Also Broken Out In Bengal Districts

Karachi, India.—Spread of the cholera epidemic to the whole of northern India is feared as the weekly death toll from the scourge rises alarmingly.

Deaths at Dinjapur increased from 42 to 229 in seven days, at Malda from 439 to 617; at Noakhali, from 63 to 177; and at Howrah, from 51 to 78.

Western Bengal is the worst affected district. The density of the population in northern India and the frequency of travel intensifies the danger in that great territory. The epidemic is becoming more acute in Calcutta, where 2,139 deaths were reported a week ago. In 11 Bengal districts, a violent smallpox epidemic has broken out, adding to the gravity of the situation. More than 100 persons died in Calcutta over the week end from smallpox alone, while deaths in the Bengal districts increased.

Unemployed In Britain

Official statistics show that 1,145,200 persons were unemployed for the week ending Nov. 28, in the British Isles. While a slight increase over the previous week, the figures are 250,867 under those of 1926 during the coal strike.

New Coastal Steamer For C. P. R.

An important addition to the Pacific Coast fleet of the Canadian Pacific was launched recently from the yards of John Brown and Co., at Glasgow, and christened "Princess Elaine". This new vessel follows along the line of the coastal steamers of the company plying between Vancouver, Seattle, Vancouver Island and Alaska.

The "Princess Elaine" is about 250 feet in length, with a gross register of 2,000 tons. She has been designed to maintain a speed of 19 knots an hour, being driven by three screws. After delivery some time in February, she will be placed on the run between

May Tap U.S. Aerial Mail

Postal Department Considering Lines Where Services Would Connect

Ottawa.—The tapping by Canadian aerial mail service of the American mail airways at convenient points of transmission is under consideration by the Post Office Department.

The scheme, broadly, is that with a service from Montreal, the United States service could be tapped at Syracuse or Albany, enroute to New York, while another line from Winnipeg would effect a junction with the United States service at Chicago and St. Paul, and on the coast planes from Vancouver would fly over to Seattle.

The Canadian air service would either be by the air force along the lines of the experiments now being carried out or by a private company of Canadians.

Recently an offer was received from a New York firm for establishing a service to Montreal, but this was not entertained. If the plan is proceeded with, and it is now in the inquiry stage, it would be broadly national and calculated to connect with the United States service at centers in the East, Middle West and Pacific points across the line.

Aerial mail services have reached a high stage of development, although the mail handled is essentially letters rather than bulky stuff, and, at that, of the more urgent class which is special delivery rate.

Claims Continents Are Drifting Apart

Difference Of Three Feet Yearly Between Europe and America Says Scientist

Ottawa.—A variation in time differences between Tokio, Ottawa and Greenwich, England, has been noted by officials at the Dominion observatory since longitudes were checked in 1904. Support thus is lent to the theory of Professor Wegener, eminent German scientist, that the continents of Europe and America are drifting apart.

Further comparisons will be made in another ten years and if the variation continues the Wegener contention will be regarded as confirmed.

Professor Wegener was struck by the fact that there were projections in the coast lines of Europe and Africa which approximately fitted into indentations in the coast lines of North and South America. He conceived the notion that at one time the four continents had been one but had been driven asunder by a mighty cataclysm of nature and were still drifting apart at the rate of approximately three feet a year.

Offer For Saskatoon Street Railway

Saskatoon.—An offer to pay the city \$1,000,000 in cash for the street railways and the electric power plant and to take over debt secured on the same, are high lights in a communication that G. M. Yule, K.C., acting on behalf of C. J. Yorath, president of the Mid-West Utilities and his associates, handed into the city hall here.

TO INVESTIGATE PIONEER BELTS OF THE WORLD

Ottawa.—Canada will cooperate with a committee of the United States National Research Council in an investigation of the five pioneer belts of the world. The survey will be made with a view to determining the capacity of these belts to assimilate migration and increase the production of food supplies.

The Dominion, Siberia, Australia, South Africa and South America are the countries in which the leading pioneer belts are situated. In Canada, the belt extends through the northern portion of the country from the Atlantic to the Pacific.

The scheme originated with the United States organization, looking toward the time when that country will require to import a greater quantity of food and when a surplus of American citizens may wish to find new homes. A resolution, it is understood, was passed by that body several months ago asking for cooperation in the work of investigation.

Dean Rutherford of the University of Saskatchewan, Dr. McIntosh and Dr. McArthur, of Queen's University, Kingston, waited upon Premier W. L. Mackenzie King and members of the cabinet in the matter. The delegation, which was heard in camera, agreed that the Dominion Government cooperate by providing every available assistance through the various federal departments. After hearing the representations Premier King promised the assistance of the federal department would be given. Already, it is understood, several universities have intimated their intention to cooperate.

Underpaid Farm Help

Says Low Wages Paid To Farm Women In Ontario

Toronto.—That no self-respecting domestic servant would work for the wages which farm women get for their labor, was the statement by Mrs. Miles Oper, of Leamington, Ont., in the course of her presidential address at the annual meeting of the United Farm Women of Ontario. She felt that economic conditions were far from satisfactory for farm women.

Concerning the grain pool, Mrs. Oper said the women were hopeful of its success. A drop in membership from 2,312 to 2,241 was reported by the secretary.

Committed For Trial

Men Charged With Collecting Information About British Forces For Soviets

London.—George Hansen, a German, and Wilfred Francis McCartney, described as an Irish American, were committed for trial before the central criminal court on charges brought under the official secrets act by a magistrate in Bow Street Court.

The two prisoners are alleged to have attempted to collect information about the British army forces, particularly the air force. At a previous hearing it was brought out that the men were gathering information believed to be useful to Soviet Russia.

Fire Chief Retires

Winnipeg.—Winnipeg's fire chief, J. E. Buchanan, has handed in his resignation after 35 years of service. Chief Buchanan comes within the recently adopted provisions of the pension by-law which requires every civic employee to retire on pension on attaining the age of 65, if he has 20 years' service to his credit.

Flying Fatalities

Washington.—From January 1 to October 31 of 1927, the first year of Government regulation and assistance of commercial flying, there were 100 persons killed in plane accidents and 88 injured in aerial service conducted for a profit, it was revealed by official statistics.

Coolidge Will Not Run

Washington.—In his own words, Calvin Coolidge is "eliminated" as a candidate for President in 1928. He has not changed his stand of August 2, when, in the Black Hills, he said: "I do not choose to run," and he emphasized now that "my decision will be respected."

How Prairie Agriculture Has Led The Way In Strengthening The Economic Bonds Of Empire

The vigorous impetus which Western development has lent to Canadian progress during the present century is pretty generally realized, but it is doubtful whether there is full appreciation of the no less striking manner in which the prairie agriculture has likewise led the way in strengthening the economic bonds of Empire.

ness life of the Dominion but to pour a torrent of new power into the sluggish channels of Empire trade. Within the past thirty years the commercial currents between Canada and the Mother Country have been revitalized and transformed. Today the United Kingdom's purchases of Canadian wheat and flour alone are many times greater in value than her total imports

For twenty years prior to 1897 Canada's commerce with the Motherland was virtually stationary, barely holding its own. Its value in 1895 was less than it had been in 1875, two decades earlier.

Then commenced the amazingly rapid settlement of the Canadian prairies, the development of wheat-growing resources on a scale that was destined not merely to remould the busi-

ness life of the Dominion but to pour a torrent of new power into the sluggish channels of Empire trade.

Western Canada's wheat-growing resources, still far from having reached the limits of their productive capacity, have woven between the British Isles and the Dominion an economic bond of such power and permanence as only the most courageous vision could have imagined less than one generation ago.

Drill Plow New Implement

Cultivates Soil and Plants Seeds in One Operation

A new implement is being introduced to Western Canadian agriculturists. It is a combination plow and seeder by which the soil can be cultivated and seed planted in one operation, and is known by the name of the "drillplow." The inventor, Peter Isaac, a Russian by birth, has been recently interesting representative farmers and business men in this implement by means of practical demonstrations. The machine can plow and plant seed at any required depth. The hauling power has to be regulated according to the nature of the soil. Mr. Isaac was brought up on a farm in Russia and had thirteen years' practical experience with drill-plows in that country. A recent demonstration of the Isaac machine at the Manitoba Agricultural College in the presence of a number of agriculturists proved very satisfactory, the machine doing everything claimed for it.

The drillplow, designed to be a time and labor-saving device as well as a weed destroyer, will come as a surprise to many, doing as it will the two services of plowing and seeding at the one operation. With the aid of the drillplow seed grain may be put into the ground in the spring with the least possible delay, the plant thus obtaining quicker growth thereby getting an even start with the weeds, as well as having the use of all available moisture.

Did Not Waste His Time

Leaving the Kansas penitentiary on parole after he had served five years for grand larceny, Alwell Austin took with him the patent rights to an invention which he has been working on while a convict. The device is an electrically operated railroad crossing gate. Another convict advanced the \$100 necessary to secure the patent.

Troubles and thunder clouds usually seem very black in the distance, but grow lighter as they approach.

To clean windows in freezing weather moisten a soft cloth with kerosene instead of water.

W. N. U. 1711

Unprofitable For Feed

Hulls Should Be Sifted From Oat Chop For Young Pigs

If oat chop is to be fed to little pigs it is a worthwhile practice to sift out the hulls. The hulls are not only unpalatable to the young stock, but they are very difficult to digest. If time cannot be taken to remove hulls, it is doubtful if oat chop can be fed profitably to pigs under three or four months of age unless one is growing the hullless oats which threshes out ready for grinding into oatmeal which is good for all classes of stock. In an experiment conducted at the Lacombe, Experimental Station to test the advantage of removing the hulls from oat chop for little pigs, it was shown that during a feeding period of 127 days the gains made by the lot fed the oat chop with the hulls removed, cost a little less than \$4 a hundred pounds, whereas it cost \$5.70 per hundred pounds with the pigs given the oat chop complete. Furthermore, the lot getting the unsifted chop had to be carried on for about six weeks on a ration of barley chop to bring them up to a finishing weight. Bulletin No. 73 of the Department of Agriculture at Ottawa, entitled "Swine Husbandry in Central Alberta," expresses the view that the labor involved in sifting the oats by hand prohibits following the practice when large numbers of hogs are fed. Hullless oats, the authors of the bulletin claim, is the logical feed to use in the weaning ration where middlings and shorts are not available. The conclusion is reached that oat hulls as contained in oat chop are affected by sunstroke last year and weaning period and for the entire feeding period of the market hog when the oat ration is continued throughout the entire feeding period.

A Profitable Sunstroke

Made Hen Double Egg Production Says Lincolnshire Man

Does sunstroke make a chicken lay more eggs?

The answer seems to be in the affirmative, judging from the eggs laid by a hen owned by R. F. Parker, of Lincolnshire, England. This fowl was effected by sunstroke last year and ever since has been laying two eggs at a time four times a week. On two occasions she has actually laid three eggs.

A short time ago the other hens in the roost became jealous of her prolific work and began attacking her. She was then separated from the others and immediately began showing her contempt for such treatment by laying eleven and twelve full-size eggs a week.

CANADIAN CHAMPIONS

Mervyn Anderson and Albert Wilton, of Roland, Manitoba, who won the hog raising and pig judging championship of the Boys' and Girls' Swine Clubs along the Canadian National Lines. They went to the Royal Exhibition, Toronto, via the Great Northern Railway, and in competition with teams from Saskatchewan and the Maritimes, won the Dominion trophy awarded by W. D. Robb, Vice-President, Canadian National Railways, in charge of colonization and agriculture. Fred and Ray Lorenz, of Shellbrook, Saskatchewan, took third prize.

The Beneficial Effect Of Tree Planting In The West Is Now Being Recognized

The planting of trees on prairie farms in Western Canada is having an appreciably beneficial effect on the quality and variety of agricultural production in that part of the Dominion. The large and growing annual distribution of planting material made from nursery stations of the Department of the Interior at Indian Head and Sutherland, Saskatchewan, is gradually changing the general appearance of the prairies in the provinces of Manitoba, Saskatchewan, and Alberta, and the development of shelterbelts is being followed by the setting out of apple and small fruit orchards, gardens of fine vegetables and by the further beautification of prairie homes with shrubs, flower beds, and extensive lawns.

A recent report from the Tree Planting Division, Forest Service, Department of the Interior, indicates the growing success of tree planting and the new avenues of development opened up as a result of this work. Further and further afield word of the success of the work is being carried and requests for stock are now received from practically every part of the prairies. At present the demand for trees is greater than it has been at any time in the twenty-seven years since the inauguration of free tree distribution and in 1927 these shipments were the largest so far with a total of 7,430,000 broadleaf seedlings and cuttings. These were sent out to over 11,000 farmers under the Department's co-operative plan. There is every prospect that the 1927 figures will be exceeded in 1928 as inspections have been made of 12,528 proposed new plantations, and trees to meet the requirements of these new applicants will be sent out next spring.

To ensure success in the establishment of shelterbelts active and helpful control is exercised by the Forest Service. From early June until freeze-up a corps of nine experienced field inspectors travel continuously inspecting proposed new plantations, advising farmers who are actually planting, and taking careful census of the plantations of the previous years. Incidentally they take note of the effect of the plantations on the social and economic life of the settler. The outstanding point has been the encouragement given to the growing of fruits and to the building up of really attractive home surroundings by the planting of ornamental shrubs and flowers and the setting out of lawns.

Twenty years ago the number of prairie farms with really first-class vegetable gardens was small while only rarely was the growing of fruits attempted. Reports to the end of August, 1927, covering 3,812 farms visited show that of this number 3,411 had good vegetable gardens; 1,258 were growing small fruits; 379 had ornamental shrubs; 265 were testing standard apples and crab apples; while 213 were growing plums.

Although the development of tree planting in the Prairie Provinces has been rapid in recent years, its rate of progress during the few years immediately following its inauguration in 1901 was comparatively slow. Settlers and others were very skeptical as to the possibility of growing trees successfully on the prairies and although the trees were to be had free only 47 farmers could be induced to set out plantations, and the total number of trees distributed in that year was but 54,800. The success of these early plantations encouraged other farmers to take advantage of the opportunity to beautify and improve their homes, and ever since there has been a gradual increase in the demand for tree-planting stock.

Up to date the number of trees shipped from the Indian Head and Sutherland stations has reached 93,131,090 broadleaf seedlings and cuttings of maple, ash, caragana, poplar, and willow; all of these were furnished free of charge to those applicants who had ground in a satisfactory state of preparation. Of evergreens, 1,645,145, have been distributed. These were white spruce, Scotch pine, jack pine, and lodgepole pine. Only limited numbers of evergreens are grown and on that account a nominal charge of \$3 per hundred is made. Although the primary function of the nursery stations is to supply trees for farm shel-

terbelts and woodlots, nearly 1,000,000 evergreen seedlings and transplants were supplied for planting on various national forests under the Dominion Forest Service.

It is evident that in addition to beautifying the farm and thus greatly improving the environment of the prairie home, the establishment of shelterbelts directly benefits the farmer by raising the quality and increasing the quantity of the products of his farm. The results obtained from fruit growing are most encouraging. With the further development of shelterbelt planting and the production of harder varieties of fruits by the institutions now carrying on that class of work, it is reasonable to expect that in the not far distant future almost every prairie farmer will be raising supplies of fruit for domestic use.

Develops Colorful Corn

Field Of Illinois Scientist Looks Like Flower Garden

The corn country of the middle-west may be transformed into rolling plains of vari-colored beauty if farmers adopt the discoveries of Harvey J. Sconce, Illinois agricultural scientist and author. Sconce has developed varieties of corn into colors that would do credit to any flower garden.

Purple, green, bronze, yellow, lavender and pink cornstalks and leaves are a few of the shades that decorated his 2,500-acre farm near here. Graduated from the agricultural school of the University of Illinois, Sconce started his selection and breeding in 1902. He has developed cobless corn, potted corn and "chrysanthemum corn."

While some of the varieties are of value only as curiosities, others have genuine economic value.

One Of The Season's Smartest Frocks

The employment of two materials, or the use of the lustrous and dull side of satin, effectively fashions the smart frock shown here. The skirt is flared at front and the back is plain, and the only adornments are the buttons on the bodice and long dart-fitted sleeves. No. 1695 is in sizes 31, 35, 38, 40 and 42 inches bust. Size 38 requires 2 1/2 yards 29-inch, or 2 yards 54-inch plain material, and 5/8 yard 39-inch contrasting. Price 29 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress maker. Price of the book 10 cents the copy.

To Continue Livestock Business

United Grain Growers To Continue Operations In Western Provinces

A resolution definitely instructing the board of directors of the United Grain Growers, Ltd., to maintain the company's livestock business in the western provinces was adopted by delegates at the annual meeting at Winnipeg.

The resolution was passed after a five-hour discussion during which a directors' report was presented recommending the closing of the company's Alberta business. Alberta delegates vigorously opposed the report. The adopted resolution reads: "We instruct the directors to continue the operations of United Livestock Growers' Ltd., on the markets of St. Boniface, Man., Calgary and Edmonton, and also at Moose Jaw if they consider it advisable to do so at that point."

The United Growers, Ltd., is the organization through which the cattle business of the U.G.G. is operated.

Helmi's days glided by on butterfly wings. She was so happy, it did not seem that winter ever could come, or any other unpleasant experience. She had grown more and more proficient in her work at the boarding-house, until now Mrs. McMann left almost everything to her. This had its drawbacks, too, for Mrs. McMann loved the centre of the stage. She loved to feel the world could not go on without her; and to have to admit that a young Finnish girl, only eighteen years old now, could come into her establishment and in six months be mistress of every detail, was not an easy thing to do. She explained to the boarders how carefully she had taught Helmi all she knew, and often sounded the pessimistic note, "and I suppose now, when I've spent hours and hours on her, she'll step off and get married."

"Watch Jack Doran, then," said one of the men, at which Bill Larsen's face darkened.

"Oh, Jack Doran," said Mrs. McMann scornfully; "Jack Doran will look a little higher than a foreign girl, and a waitress at that. His people are prominent citizens in the East, and although Jack is a wild young chap and likes his fun, he wouldn't go to the length of marrying so far out of his station. I know Jack pretty well, and I'm not afraid."

"Well, you know," said the man who had spoken first, "he wouldn't go so far wrong if he married Helmi. If you ask me, she's as good as he is."

This conversation took place on a Sunday afternoon in September. Jack and Helmi had gone for a drive to the English River, where, beside the falls, they had cooked their bacon on a fire of sticks. It was a dreamy day in the luxuriant Autumn, when the foliage was beginning to show like gold brocade against the darker green of the mountains.

Helmi had brought her English reader, and put it in his hand as soon as the meal was over. "Read it, Jack," she said, "this is the place."

"By Nebo's lonely mountain,
On this side Jordan's wave,
In a vale in the land of Moab
There lies a lonely grave."

Jack read the poem through. "Do you understand it?" he asked.

Helmi shook her head. "Not all — some — but I love it. One does not have to understand. It gives me such a happiness here, touching her heart, that I want to cry. I know it is about a good man. He died — God buried him quiet. Maybe it was over in that mountain — that would be good place. Read it again, Jack, please; I will watch close. Maybe I will see angels going into that cave!"

Jack laughed. "Helmi, you're a queer stick," he said. But he too, found himself lifting his eyes to the sunlit mountain, for never before to him had the solemn and moving measures throbbed with such majesty and power; and when it was done, and Helmi's eyes, shining with a hidden fire, looked into his, it seemed to him that the soundless feet of angels were passing by.

Helmi sat with her back against a tree, her shining hair catching the sunshine like the golden trees around her. Her eyes were fixed on the distant hills in deep adoration. To Jack she seemed like some beautiful spirit of the wood.

(To Be Continued.)

Artificial flowers made of feathers are becoming popular in England.

Vast Collection Of Gifts Of Remembrance

Have Been Placed Within Tomb Of Unknown Soldier

The tomb of the Unknown Warrior in Westminster Abbey was opened recently. The fact, which has become known to many persons has occasioned considerable surprise and some anxiety.

Exactly why the tomb was opened can now be explained.

This important step was taken by the Abbey authorities to enable them to place inside the tomb the vast collection of tokens of remembrance, some of them of great intrinsic value, placed upon it by the relatives of the fallen.

It was not until some time had elapsed after the formal consecration of the tomb that the problem of dealing with these spontaneous gifts became acute.

Every day the officials saw the pile of gold and silver trinkets, medals, crucifixes, rings and other articles, growing larger and larger.

For a time, the tokens were lodged with the Dean's vergor, but it soon became obvious that a permanent home would have to be found for them.

Accordingly, it was decided to place them in the tomb with the remains of the Unknown in whose honor they had been deposited.

The actual task of opening the tomb was conducted with the utmost secrecy. In the presence of a few responsible officials a small cavity was made, into which the pathetic collection of relics was gently and lovingly placed.

Predicts Rapid Growth Of Canada

Population Of 23,000,000 People By 1950, Believes Premier Gardiner Of Saskatchewan

A prediction that Canada would have a population of 23,000,000 people by 1950 and the declaration that the Dominion does not want parasites because "if there is any country in the world where men cannot live without working it is Canada," featured an address delivered by Premier James G. Gardiner of Saskatchewan at a Canadian Club banquet held in Brandon recently.

Mr. Gardiner graphically outlined the future development of Canada, and stressed the urgent necessity of increasing the country's population. He stated that a great many of the men who had made a success of farming in Saskatchewan had come to Canada early in life without farming experience.

Sounds Note Of Warning

Dangerous Doctrines Appearing In The West, Says University Professor

A note of warning that Western Canada was coming under the sway of an intellectual aristocracy in the same way that Russia had been enthralled by a political and social aristocracy was voiced by Dr. W. M. Swanson, professor of economics at the University of Saskatchewan, addressing the Saskatoon Eclectic Club.

"There are dangerous doctrines appearing in the West," he said. "A new tyranny is springing up. Our political and social life is in danger of being directed by an intellectual aristocracy which seeks to shape our politics and direct our affairs. Such an aristocracy it was, that ruined Imperial Russia—an aristocracy that flourished on the poverty and suffering of the common people."

A Good Definition

The geography lesson was almost over, and the teacher decided it was about time she asked a few questions. "What are the leaders of different Red Indian tribes called?" was her first query.

"Chiefs," answered a small boy. "Correct," smiled the teacher. "Now, can anybody tell me what the wives of these men are called?"

For a minute or two there was complete silence. Every pupil in the class was thinking hard. Finally, the same small boy stepped into the breach.

"Miss Chiefs," he cried proudly.

Fifty new Wesleyan chapels have been opened in London in the past year.

A rainfall of one inch means 27,143 gallons of water per acre. This is equivalent to 226,512 pounds.

Little Helps For This Week

"Blessed are they which do hunger and thirst after righteousness; for they shall be filled."—Matthew v. 6.

The body is not much. "I were best take up the soul and leave the rest. It seems to me the man who leaves the soul to perish is as one who gathers up the empty sheaves. When all the golden grain is done, —Joachim Miller.

The more the soul withdraws, so to speak, from the body, and retires within itself, the more it rises above itself; and the closer it cleaves to God, the more the life it lives on this earth resembles that which it will enjoy in heaven, and the larger foretaste it has of the first fruits of that blessed harvest. Aspire, therefore, to holiness, without which no man shall see the Lord.—Archbishop Leighton.

MADE HER BABY PLUMP AND WELL

Nothing makes a mother more grateful than a benefit conferred upon her child. Mothers everywhere who have used Baby's Own Tablets for their children speak in enthusiastic terms of them. For instance, Mrs. Zepherin Layole, Three Rivers, Que., writes:—"Baby's Own Tablets are a wonderful medicine for little ones. They never fail to regulate the baby's stomach and bowels, and make him plump and well. I always keep a box of the Tablets in the house and would advise all mothers to do likewise." Most of the ordinary ailments of childhood arise in the stomach and bowels, and can be quickly banished by Baby's Own Tablets. These Tablets relieve constipation and indigestion, break up colds and simple fevers, expel worms, allay teething pains and promote healthful sleep. They are guaranteed to be free from injurious drugs and are safe even for the youngest and most delicate child. The Tablets are sold by medicine dealers or by mail at 25c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

If Adam were living he would be 5931 years old, according to computations of the late John P. Brady of Baltimore, who found the first man was born in the Garden of Eden on October 28, 4004 B.C.

An excellent protection against worms can be got in Miller's Worm Powders. They render the stomach and intestines untenable to them. They heal the surface that have become inflamed by the attacks of the parasites and serve to restore the strength of the child that has been undermined by the draughts that the worms have made upon it, and their operation is altogether health giving.

Now and then news comes of a couple of the most experienced canoeists getting drowned. It goes to show that eternal vigilance is the price of safety when using the canoe.

CURLING RINKS ELECTED
AT WEDNESDAY'S MEETING

At a special meeting of the members of the Carbon Curling Club, held in the Municipal office last Wednesday night, skips and rinks were elected for the season, and many other items of interest were discussed. The fee for curling this year was set at \$15 for the season, this being the lowest possible fee that could be profitably charged so that the debt incurred this year in building the new rink, could be taken care of. There will be ten complete rinks this year, the following being the order in which the skips and rinks were elected.

SKIP	THIRD	SECOND	LEAD
R. J. Faibairn	F. Bessant	R. C. Barr	P. Edwards
